

Pathways to ADSB Compliance

This is one of the four seminars available to attend at the Maryland Regional Festival of Flight. How do you take an existing aircraft and equip it to meet the 2020 ADSB requirement? 2020 and the ADSB equipment requirements are getting closer. Most of the equipment that will be available to meet this requirement is either on the market or has been announced by now. With a fleet of aircraft with a wide variety of already installed equipment there are many paths that can be followed to achieve compliance. What choices do you have and how do you choose?

Directions: To drive in, follow the map directions to the AOPA Headquarters building at the north end of the airport. Park in the lot behind the building and enter through the rear door. Signs will be posted for guidance.

If you fly in, land at KFDK and tell ground control you want to taxi to parking for the MDRFF.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
